

PRESS RELEASE

PHARMAPACK EUROPE 2016, 10th & 11th February – PYLOTE STAND #851

PYLOTE UNVEILS PYCLEAR™ PROTECTION, A MAJOR INNOVATION PROTECTING PATIENTS FROM THE ADVERSE EFFECTS OF PRESERVATIVES

Toulouse, 1st February 2016 - Pylote will unveil PYCLEAR™ PROTECTION at the Pharmapack Europe on 10th and 11th February 2016. **A breakthrough innovation that replaces antimicrobial preservatives used in many pharmaceutical specialties or in cosmetic and food products** and for which no change is needed in packaging nor in existing manufacturing processes.

PYCLEAR™ PROTECTION provides an ideal “eco-friendly” answer to the regulatory authorities’ requirements who are looking to remove the use of preservatives. **It is highly suited for multi-dose eye drop flasks, catheters and nasal used preparations.**

Unveiled for the first time at Pharmapack Europe, PYCLEAR™ PROTECTION provides patients with efficient protection when under treatment:

- **Protects against the risk of external contamination and from the risk of adverse effects of preservatives** used in end-consumer drug products.
- **Protects patients throughout the treatment period and ensures clean & pure doses upon each application.** Moreover, the devices using Pylote technology have the advantage of removing through direct contact the risk of contamination of the nozzle tips, due to unintentional contact with skin and/or lacrimal fluid.
- **Provides protection with no change in patient treatment methods.**

At a conference on Wednesday 10th February at 12.15pm, Professor Philippe Arnaud, Hospital Pharmacist, and Head of Pharmacy at Bichat-Claude Bernard Hospital, AP-HP, Paris and Loïc Marchin, CEO of Pylote, will present the beneficial effects of this innovation in microbiological protection. ABOUT PYLOTE - Founded in 2009, Pylote is committed to green industrial chemistry in the mineral and ceramic chemical sector. Through the range of its efficient PYCLEAR™ solutions, Pylote conceives and develops innovative mineral microspheres to sell solutions which can be integrated into numerous consumer products. Pylote’s solutions have a major competitive advantage as they make the end products smarter, by giving new and specific advantages and attributes to materials, with no change to the existing manufacturing process. Pylote helps their clients, who are present in pharmaceutical, cosmetic, luxury, food or industrial markets, to propose end consumers with more eco-friendly products that are greener, cleaner and safer.
